As you can see I have no metastock data in the Quotemanager

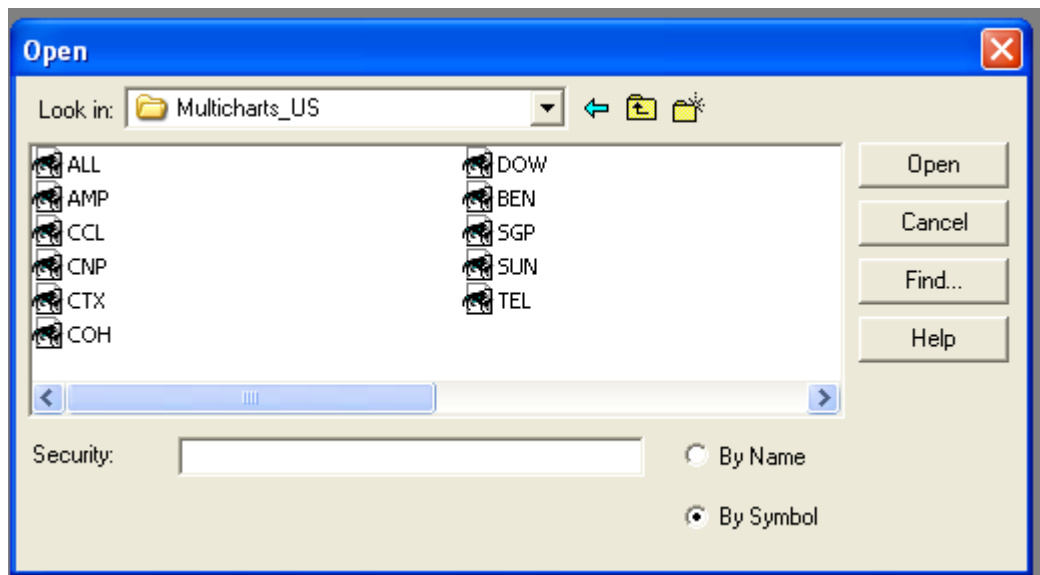

Using the Metastock downloader...

I have the following symbols in the directory c:\Pd\Aus\Custom Folders\Multicharts\_Aus

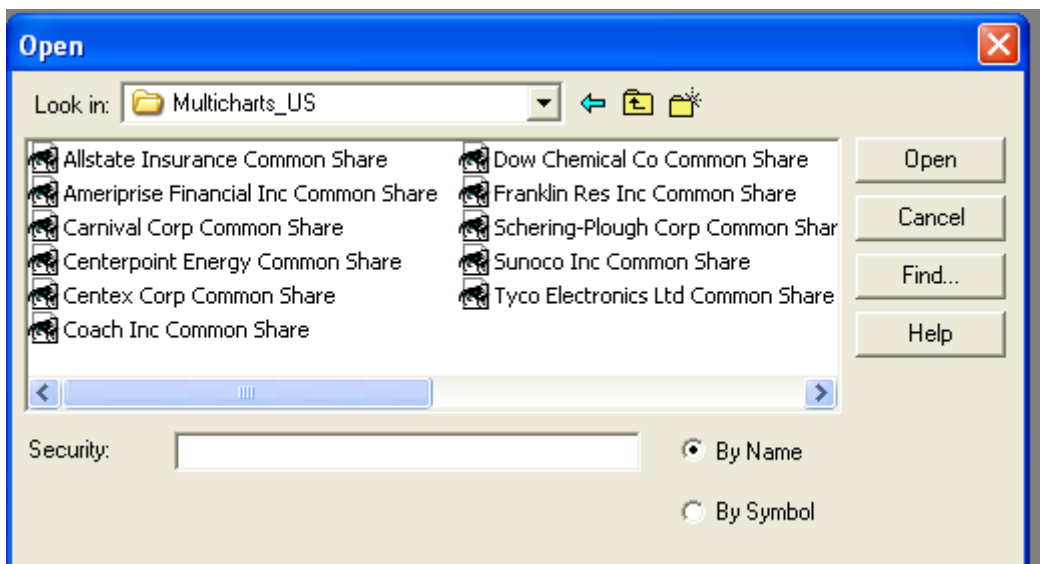

And the symbols have the above names

Using the Metastock downloader...

I have the following symbols in the directory c:\Pd\Us\Custom Folders\Multicharts\_Us

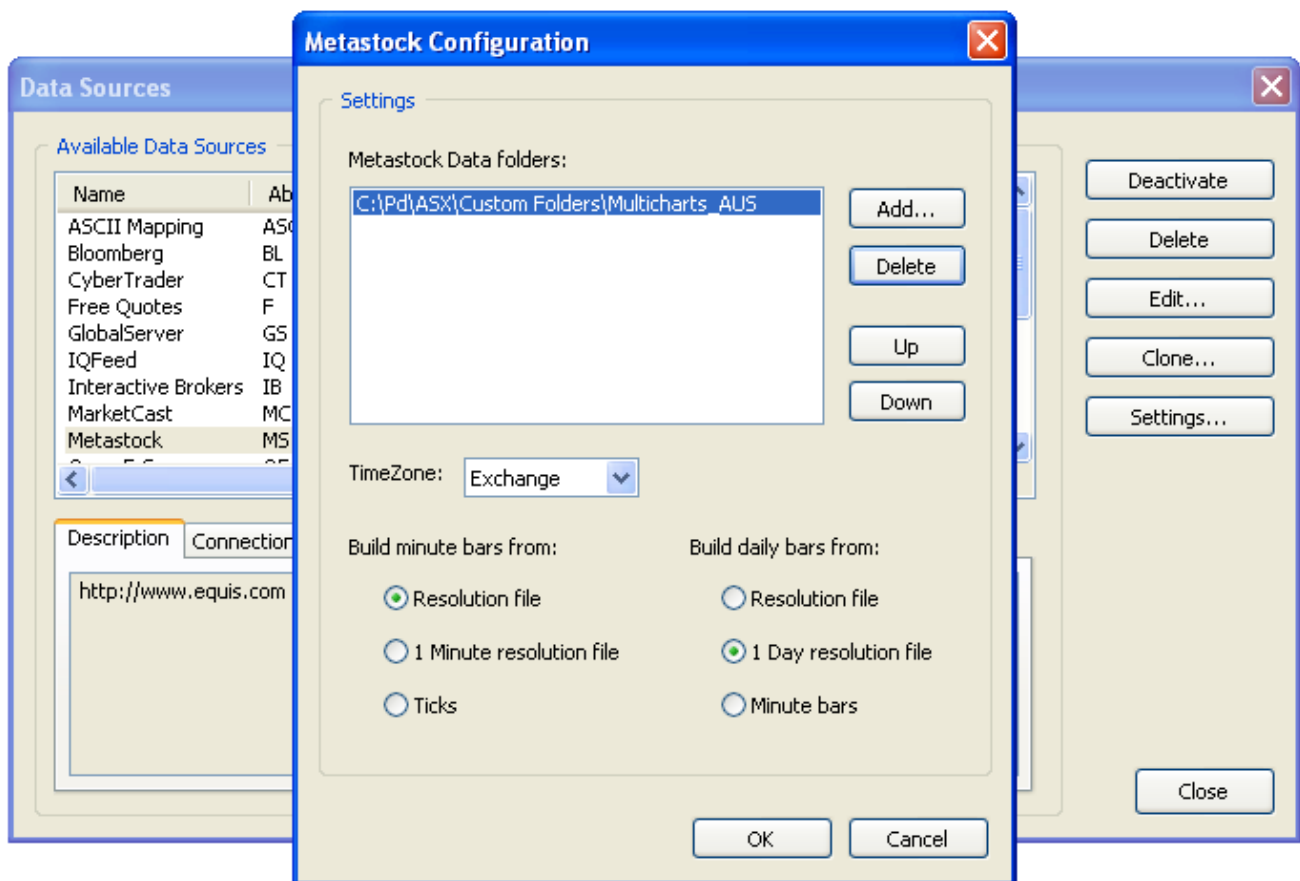

And the symbols have the following names

In another program there is no problem looking at 2 identical symbols

ALL	ARISTOCRAT LEISURE O
ALL	Allstate Insurance Comm
AMP	AMP LIMITED ORDINARY
AMP	Ameriprise Financial In
BEN	BENDIGO BANK LIMITED
BEN	Franklin Res Inc Common

TEL	Tyco Electronics Ltd Co

Now I add the following directory to Multicharts

c:\Pd\Aus\Custom Folders\Multicharts\_Aus

**Insert Symbols Into Portfolio - Metastock**

You can see the Australian stocks have been added to Quotemanager ok

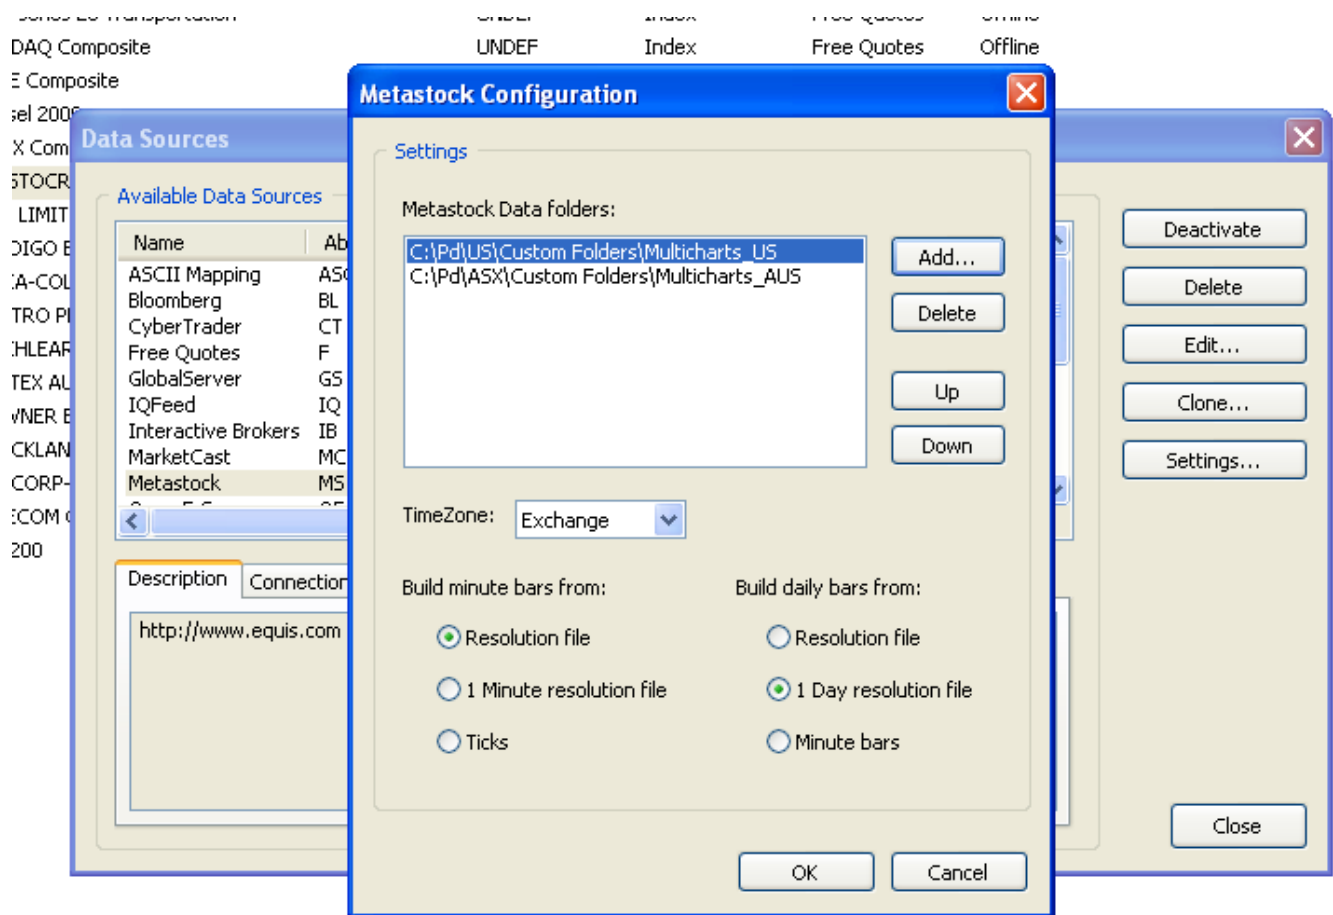

I can select a stock from the New Chart window

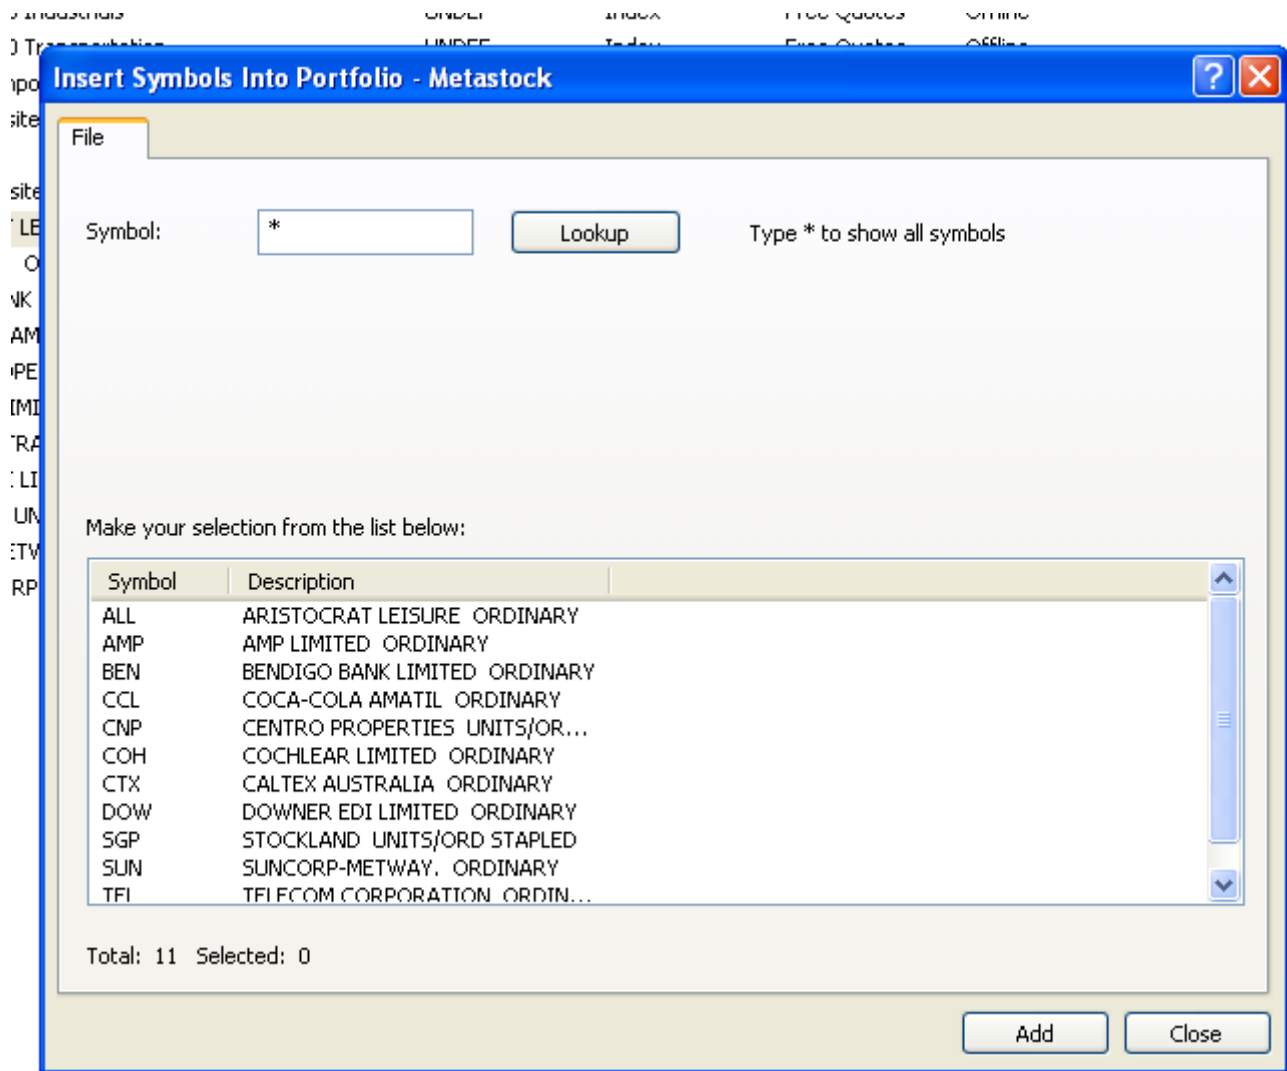

Here is a chart of an Australian stock AMP

Now add the directory c:\Pd\US\Custom Folders\Multicharts\_US

I go to add the symbols

Problems from here .....

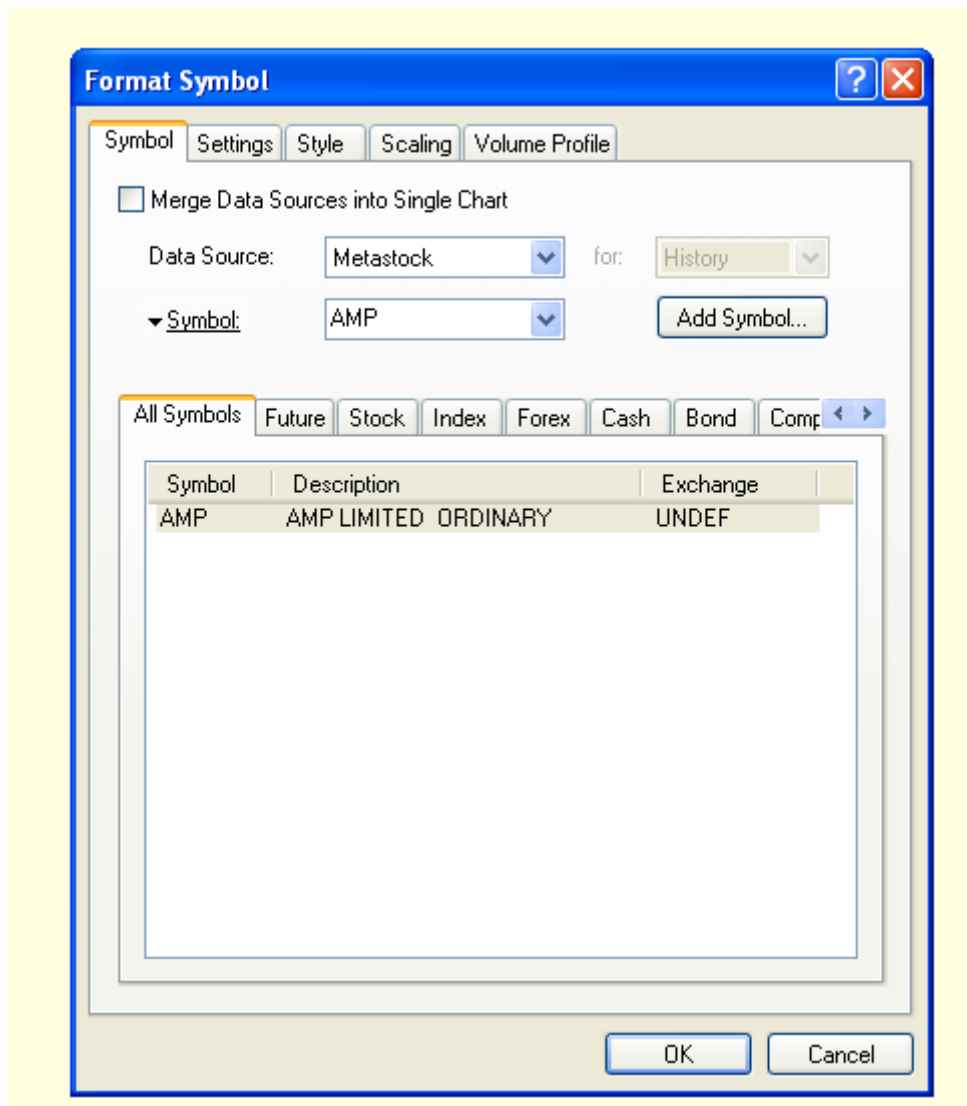

Multicharts only brings up 11 symbols

Multicharts should display 22 symbols just like the other trading program did on page 4 of this document.

Anyway – I add the symbols to the quotemanager

Nothing changes – I still have the 11 original Australian symbols – NO US symbols

I go to plot any of the symbols

Again only the original Australian symbols are available

I select AMP again as an example

The data is not the same as the previous chart

Multicharts is plotting the data from the US symbol AMP

BUT

It is displaying all the information from the Australian symbol
