

Hello

My name is Ispas Aurel and I have two license purcesa from MC (ispas.aurel and ispas aurel 2) .
I never trade or use bid/ask trading posibility before ... not i try .. and I think I need HELP .. to understand ..

Setup Procedure

EURUSD 15000 Tick Charts

1. ASK 15000
2. BID 15000

The image displays two side-by-side screenshots of the 'Strategy Properties' dialog box in a trading software interface.

Perform Live Trading 2 days ...

after 2 days

Issues .. ? !

... Back testing and Live was very far from reality ..

I check over and over all settings and conditions

*** Than by chance .. i switch from " Extended Strategy Back testing " to "Clasic Strategy " = resaults was '100% Identical ..

Question is ?

Why on live trading the strategy dont take in consideration the BID and ASK ?

(we alwais have two charts (one bid and one ask / same size / same conditions for real trading and back testing)

Thanks
